QS4 AUDIOMETRIC TESTING BOOTH

Multiple Occupancy Audiology Testing

The QS4 is an acoustic room capable of being used as a standalone audiology booth. Comfortably large enough to accommodate up to 6 people, the booth is available to order with or without furniture to suit your needs. The QS4 uses superior acoustic insulation to ensure valid hearing testing.

The low doorstep makes the QS4 accessible for wheelchair users. Automatic air ventilation creates a fresh and comfortable working environment. There is an option to add a screen bracket to the power column on the rear glass panel allowing for interactive content to be used during a diagnostic test.

MATERIAL DESCRIPTION

Glass: Acoustic laminated glass.

Frame: Formica laminate on birch plywood with varnished trim.

Exterior Panels: Painted sheet metal.

Solid Walls & Roof: Sandwich element of sheet metal, birch plywood, recycled acoustic foam and acoustic felt. Anti-static and stain-resistant low pile carpet for public spaces.

Electric: Air circulation system with occupancy sensor.

Power Column: The power column, located on the back glass is a fixed component which provides an option for a display bracket or whiteboard. The power column set up must be chosen (72cm or 90cm), regardless of accessories.

Table: Formica laminated on birch plywood with varnish trim.

Chairs: Not included as standard.

Lighting: Automated LED lighting.
